

Standard Breechings

Our standard breechings are available in both dividing & collecting formations. Dividing breechings are used to split a single inlet hose line into two outlets. Collecting breechings are used to combine two hose inlet lines into one outlet. Available in light alloy, gun metal or anodised aluminium.

DIVIDING BREECHING

Dividing breechings are used to split a single hose line into two. Single inlet with two outlets as standard.

MATERIALS: Light Alloy
Gun Metal
Anodised Aluminium

INLET: 1 x 2 ½" Male Instantaneous (BS336),
BSP, Storz

OUTLET: 2 x 2 ½" Female Instantaneous (BS336),
BSP, Storz

Other International connection types available on request.

MAX WORKING PRESSURE: 16 Bar

COLLECTING BREECHING

Collecting breechings are used to combine two hose lines into one. Two inlets with a single outlet as standard.

MATERIALS: Light Alloy
Gun Metal
Anodised Aluminium

INLET: 2 x 2 ½" Male Instantaneous (BS336),
BSP, Storz

OUTLET: 1 x 2 ½" Female Instantaneous (BS336),
BSP, Storz

Other International connection types available on request.

MAX WORKING PRESSURE: 16 Bar
