

Suction Hose

Our grey PVC suction hose is a heavy duty suction and delivery hose. The hose is reinforced with a shock resistant PVC Spiral giving structure, toughness and durability. The main purpose of this hose is for large volumes of water to be transferred from source into a fire engines when a pressurised water source is unavailable.

HOSE DETAILS

- Tough, flexible and extremely durable for severe working conditions.
- Minimal friction loss achieved by a very smooth internal wall.
- Outstanding resistant to the effects of water.
- Crush resistant anti-shock PVC spiral helix encapsulated in a grey flexible PVC cover.

COLOUR

Standard - Grey

*Other options available on request.

TEMPERATURE RANGE

-10°C to +60°C

COUPLING

British standard round thread couplings are the most common coupling option available in both 4" and 5.5". Other International coupling options are available on request.

BSRT Coupling

Internal Diameter		BAR	M.H ² O	Bend Radius	Lengths
mm	inch				
102	4	4.3	9	630	8 / 10
140	5.5	3.7	8	1000	8 / 10
