

Venom Low Expansion Foam Turbo Branchpipe

The RHL Venom Low Expansion Foam Turbo Branchpipes have been designed for excellent performance with all foam concentrate types, offer longer throw and superior cooling compared to the Medium Expansion Foam Branchpipes.

All models are supplied with foam pick-up line and stainless steel piercing tube, and are fully self-inducting. Unlike any other, the Venom Low Expansion Foam Branchpipe comes with a stirrup handle and pistol grip for greater user control.

FEATURES

Hard Anodised Aluminium Construction.

Corrosion Resistant.

Long Throw Capability.

Various Flow Options.

Lightweight.

Easy to Service & Repair.

Pistol Grip & Stirrup Handle On/Off.

Technical Specification	
Foam Expansion Ratio	> 5
Inlet Connection	All International Coupling Types
Body Material	Hard Anodised Aluminium / Stainless Steel
Valve Material	Aluminium
Handle Material	Injection Moulded Nylon
Working Pressure	7 bar
Max Range at Max Flow	32 Metres

Supplied with foam pick-up line and stainless steel piercing tube.

Compatible with RHL Variable In-Line Foam Inductor with Pick-up Line.

Model	Self-Inducting	Working Pressure	Flow Rate (litres per min)	Jetting Range	Foam Expansion
VLET240	Yes	7 Bar	240	> 24m	> 5 times
VLET480	Yes	7 Bar	480	> 28m	> 5 times
VLET960	Yes	7 Bar	960	> 32m	> 5 times
