

Venom Medium Expansion Foam Branchpipe

The RHL Venom Medium Expansion Foam Branchpipes have been designed for excellent performance with all foam concentrate types, and are capable of producing large quantities of foam in situations requiring an abundance of rapid foam cover with low water usage.

All models offer a continuous stable medium expansion foam cover at low pressure right up to the maximum 6 bar. Compatible with the RHL Variable In-Line Foam Inductor.

FEATURES

- Hard Anodised Aluminium Construction.
- Corrosion Resistant.
- Long Throw Capability.
- Various Flow Options.
- Lightweight.
- Easy to Service & Repair.

Compatible with RHL Variable In-Line Foam Inductor with pick up line - for use with non self-inducing Branchpipes

Technical Specification	
Foam Expansion Ratio	> 50
Inlet Connection	All International Coupling Types
Body Material	Hard Anodised Aluminium / Stainless Steel
Valve Material	Aluminium
Handle Material	Injection Moulded Nylon
Working Pressure	6 bar
Max Range at Max Flow	12 Metres

Model	Self-Inducing	Working Pressure	Flow Rate (litres per min)	Jetting Range	Foam Expansion
VME240	No	6 Bar	240	> 8m	> 50 times
VME480	No	6 Bar	480	> 10m	> 50 times
VME960	No	6 Bar	960	> 12m	> 50 times
